

# Business Agility for Leaders and Managers

## Two Full Days or Four Half Days

### Overview

The markets of today and tomorrow reward organisations that have the capacity and willingness to adapt. Market leaders have established cultures and management approaches that encourage creativity and rapid innovation. These approaches, commonly referred to as agile, encourage leaders to pivot faster in response to our volatile, uncertain, complex, and ambiguous world.

Many companies attempt agile transformation, but they will be unsuccessful without shifting traditional leadership mindset, abilities, and development. It's like putting a square peg into a round hole.
