Paradigm Innovations

SAFe® Implementation Design Facilitation Support
Two Full Days or Four Half Days

Overview

Scaled Agile Framework (SAFe) is all about guiding enterprises in scaling lean and agile practices. It promotes alignment, collaboration and delivery across large numbers of agile teams. Developed by practitioners, SAFe leverages three primary bodies of knowledge: agile software development, lean product development, and systems thinking.

During this two-day hands-on implementation engagement, the participants would understand the SAFe® Implementation Design

Who Should Attend

CEO, CTO, Directors, Portfolio, Program, Product, Project Managers, Enterprise Architects, Release Train Engineers, Business Owners, Solutions Managers, Agile

Prerequisites

Basic understanding of SAFe framework or attended Leading SAFe program.
