

SAFe® Maturity Self-Assessment Facilitation Support

Two Full Days and Four Half days

Overview

Scaled Agile Framework (SAFe) is all about guiding enterprises in scaling lean and agile practices. It promotes alignment, collaboration and delivery across large numbers of agile teams. Developed by practitioners, SAFe leverages three primary bodies of knowledge: agile software development, lean product development, and systems thinking.

During this two-days hands-on implementation engagement, the participants would understand the maturity levels and the metrics of the teams and organisation

As part of an Agile Release Train's commitment to relentless improvement, all the train teams must reflect and assess the effectiveness of their Scrum and XP practices on a regular cadence. For most, once a PI seems to be a logical frequency. The Scaled Agile Framework provides a self-assessment tool to support this process and makes it freely

Metrics are agreed-upon measures used to evaluate how well the organisation progresses toward the portfolio, large solution, program, and team's business and technical objectives.

Who Should Attend

CEO, CTO, Directors, Portfolio, Program, Product, Project Managers, Enterprise Architects, Release Train Engineers, Business Owners, Solutions Managers, Agile Coach, SAFe Program Consultants.

Prerequisites

Basic understanding of SAFe framework or attended Leading SAFe program.

SAFe® to Maturity Self-Assessment Facilitation Support includes

Measure and grow are accomplished via two separate assessment mechanisms, designed for significantly different audiences and different purposes.

- The SAFe Business Agility Assessment is designed for LPM and portfolio stakeholders to assess their overall progress on the ultimate goal of true business agility.
- The SAFe Core Competency Assessments help teams and trains improve on the technical and business practices they need to help the portfolio achieve that larger goal.

Two assessment patterns that can be used are

- Each participant fills the assessment independently, and then the group discusses and analyses the results together
- All participants discuss each statement together and reach a consensus on the score for each statement

Outcomes from this engagement

- Developed an Enterprise Balanced Scorecard
- Interpreted Lean Portfolio Management Self-Assessment reports
- Applied Value Stream Key Performance Indicators
- Developed Feature Progress Report
- Developed Program Predictability Measure
- Analysed Performance Metrics
- Interpreted Agile Release Train Self-Assessment
- Measured the Continuous Delivery Pipeline Efficiency
- Measured the deployments and Releases per Timebox
- Developed Innovation Accounting and Leading Indicator
