SAFe® Portfolio Planning and Value Streams Facilitation Support
Two Full Days or Four Half Days

Overview

Scaled Agile Framework (SAFe) is all about guiding enterprises in scaling lean and agile practices. It promotes alignment, collaboration and delivery across large numbers of agile teams. Developed by practitioners, SAFe leverages three primary bodies of knowledge: agile software development, lean product development, and systems thinking.

SAFe is designed to manage longer planning horizons. Whereas development teams typically work to two to three iterations ahead, larger organisations need to plan much further. Often they work with a very high level, 12 to 18-month roadmap, then plan collaboratively with the teams for three months of work.

Who Should Attend

CEO, CTO, Directors, Portfolio, Program, Product, Project Managers, Enterprise Architects, Release Train Engineers, Business Owners, Solutions Managers, Agile Coach, SAFe Program Consultants.

Prerequisites

Basic understanding of SAFe framework or attended Leading SAFe program.
